

1.75 Gyr

10 kpc

A two-panel image showing the evolution of a galaxy at 1.75 Gyr. The left panel is a blue-toned image showing the galaxy's structure with a central dark blue core and diffuse blue filaments. The right panel is an orange-toned image showing the same galaxy with a more concentrated, bright orange core. A scale bar labeled '10 kpc' is in the bottom left of the left panel.
