

1.50 Gyr

10 kpc

A two-panel figure showing a simulation at 1.50 Gyr. The left panel is a blue-toned image of a galaxy with a central dark region and a filamentary structure extending to the right. The right panel is an orange-toned image showing two bright, elongated spots corresponding to the central region and the filament tip. A scale bar labeled '10 kpc' is in the bottom left.
